

Ramesh's Home Media Server Knowledge Base

Owner

Name: Ramesh

Primary Goal: Fully automated Tamil movie acquisition and media serving system running on Raspberry Pi with manual approval before downloads.

Hardware

Server

- Raspberry Pi 3B
- Running 24/7
- Used as home media server

Operating Environment

- CasaOS
 - Applications deployed as CasaOS containers/apps
-

Media Server Evolution

Original Setup

- Plex Media Server
- Hosted on Raspberry Pi 3B
- Used for local media streaming

Current Direction

- Emby used as primary Tamil movie library
 - Emby automatically detects newly downloaded movies
-

Desired Media Workflow

Goal

```
Tamil Movie Added
    ↓
Radarr Monitors
    ↓
Jackett Searches Torrents
    ↓
Telegram Notification Sent
    ↓
Manual Approval
    ↓
Transmission/qBittorrent Download
    ↓
Movie Saved
    ↓
Emby Refreshes Library
    ↓
Movie Available to Watch
```

Core Applications

1. Radarr

Purpose

- Monitor movie lists
- Manage movie metadata
- Search torrents automatically

Configuration

Root Folder

```
/mnt/media/movies/tamil
```

Quality Profile

Tamil

or

tamil

tag

Responsibilities

- Monitor Tamil movies
 - Trigger searches
 - Hand off downloads
-

2. Jackett

Purpose

Torrent indexer aggregation

Configuration

Torznab Feed

Radarr connects to Jackett using:

Torznab

Responsibilities

- Search multiple torrent sites
 - Return results to Radarr
-

3. Telegram Bot

Purpose

Manual approval layer

Desired Behavior

```
Movie Found
  ↓
Send Telegram Message
  ↓
Approve / Reject
  ↓
If Approved
  ↓
Start Download
```

Example Message

```
Movie Found:

Title: Leo (2023)
Quality: 1080p
Size: 3.2GB

Approve?
[YES]
[NO]
```

Reason

Avoid:

- Fake uploads
- Wrong language releases
- CAM prints
- Low-quality torrents

4. Download Client

Two download clients were discussed.

Option A — qBittorrent

Pros

- Better web UI
- Easier automation

- Better search ecosystem

Option B — Transmission

Pros

- Lightweight
- Ideal for Raspberry Pi

Common Configuration

```
Category: tamil  
Port: 9091
```

Download Flow

```
Radarr  
  ↓  
Transmission  
  ↓  
/mnt/media/movies/tamil
```

5. Emby

Purpose

Media serving

Library Path

```
/mnt/media/movies/tamil
```

Settings Discussed

Auto Library Refresh

Enabled

Real-Time Monitoring

Enabled

Result

```
Download completes
  ↓
Emby detects file
  ↓
Metadata downloaded
  ↓
Movie visible automatically
```

Directory Structure

Recommended Structure

```
/media
├── movies
│   ├── tamil
│   │   ├── Movie 1 (2025)
│   │   ├── Movie 2 (2025)
│   │   └── Movie 3 (2025)
```

or

```
/mnt/media
├── movies
│   └── tamil
```

Automation Logic

Current Target Automation

Step 1

Radarr monitors:

- Upcoming Tamil movies
- Wanted Tamil movies

Step 2

Jackett searches indexers

Step 3

Search results generated

Step 4

Telegram notification sent

Step 5

User approves

Step 6

Torrent added to Transmission

Step 7

Transmission downloads

Step 8

Movie moved into Tamil folder

Step 9

Emby refreshes

Step 10

Movie available for streaming

Remote Access

Tailscale

Purpose

Secure remote access to:

- CasaOS
- Emby
- Raspberry Pi

Advantages

- No port forwarding
 - Private VPN network
-

Cloudflare Tunnel

Purpose

Public remote access

Advantages

- No router configuration
- Secure HTTPS endpoint

Potential Uses

- CasaOS dashboard
 - Emby web access
 - Self-hosted services
-

Networking

Common Service Ports

CasaOS

```
http://<pi-ip>
```

Emby

8096

(Default)

Transmission

9091

(Default)

Storage Usage

Primary Media Storage

Tamil Movies

Stored under:

/mnt/media/movies/tamil

Application Mapping

Application	Path
Emby	/mnt/media/movies/tamil
Radarr	/mnt/media/movies/tamil
Transmission	Downloads end here

Design Principles

Manual Approval

Downloads should not start automatically.

Reason

- Quality control
 - Language verification
 - Avoid bad torrents
-

Lightweight Services

Hardware:

Raspberry Pi 3B

Preference:

- Low memory usage
 - Lightweight containers
-

Fully Automated After Approval

Once approved:

No further human intervention

Required.

Future Enhancements

Sonarr

For Tamil TV Shows

Overseerr / Jellyseerr

User request portal

Telegram Inline Buttons

Approve directly from Telegram

Auto Cleanup

Delete old torrents after seeding

Watchlists

Automatically track movies from:

- IMDb
- TMDb
- Trakt
